Application/Control Number: 10/717,680

Art Unit: 1623

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-7 and 32, drawn to a metal ion crosslinked polysaccharide and a method of crosslinking a polysaccharide, classified in class 536, subclass 124 plus.
 - II. Claims 8-15, drawn to a method of fracturing a subterranean formation, classified in class 405, subclass 154.1 plus.
 - III. Claims 16-23, drawn to a method of providing sand control in a well bore penetrating a subterranean formation, classified in class 507, subclass 211 plus.
 - IV. Claims 24-31, drawn to a method of producing hydrocarbons from a subterranean formation, classified in class 585, subclass 240.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of group I, which is drawn to a method of crosslinking a polysaccharide and the product thereof is obviously different from the inventions of Group II-IV, which are drawn to a method of fracturing a subterranean formation, a method of providing sand control in a well bore penetrating a subterranean formation, and a method of producing hydrocarbons.

Inventions II and III-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of group II, which is drawn to a method of fracturing a subterranean formation is obviously different from the inventions of Group II-IV, which

Application/Control Number: 10/717,680

Art Unit: 1623

are drawn to a method of providing sand control in a well bore penetrating a subterranean formation, and a method of producing hydrocarbons.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of group III, which is drawn to a method of providing sand control in a well bore penetrating a subterranean formation is obviously different from the invention of Group IV, which is drawn to a method of producing hydrocarbons.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.
- 4. No telephone call was made to Applicants to request an oral election to the above restriction requirement because no telephone No. of a contact person had been made of record.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Telephone Number, Fax Number, and Other Information

6. For 24 hour access to patent application information 7 days per week, or for filing applications, please visit out website at www.uspto.gov and click on the button "Patent Electronic Business Center" for more information.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Everett White whose telephone number is (571) 272-0660. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson, can be reach on (571) 272-0661. The fax phone number for this Group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1600.
